Transition to Full Stack Development

- Proactively Transitioned into MERN & frontend development by building real-world projects and structured learning.
- Developed responsive, component-based UIs using **React.js, Next.js, TypeScript & Tailwind CSS**.
- Converted **Figma / Framer** designs into pixel-perfect UI components.
- Improved 12+ **REST APIs** using **Node.js & Express.js** and reducing response time by 32%.
- Designed database models using **MongoDB / Mongoose** and worked with **SQL**.
- Implemented **JWT authentication & role-based access control**.
- Managed complex state with **Redux Toolkit** and React Hooks to reduce UI inconsistencies.
- Integrated DevOps workflows using **GitLab CI/CD, Docker & Jenkins**.
- Deployed frontend apps to **Vercel** and backend services to **AWS**.
- Used **Postman** for API testing and debugging to ensure reliable backend integration. unit testing with **Jest & React Testing Library**.
- Collaborated in **Agile / Scrum** using Jira for sprint planning & task tracking.
